DETAILED ACTION

Claim Objections

1. Claim 12 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Clearly, the "cloth, mesh, filter foam rubber, or filter screen, or filter line" are alternative filters that do not further limit the cotton core recited in claim 1. Accordingly, the claim is not further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "can be operated like a washing machine" in lines 5-6. It is unclear what subject matter applicant regards as the invention when reciting the limitation. For examination purposes, the limitation will be considered to mean that the cleaning apparatus moves. Appropriate action required.

Claims 2-16 are rejected as depending from a rejected claim.

4. Claim 4 recites the limitation "the outside sewage pipe" in lines 5 and 6. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 1724

5. Claims 5, 13 and 16, respectively, recite the limitation "the active carbon". There is insufficient antecedent basis for this limitation in the claim.

6. Claim 12 recites the limitation "the air conditioner" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

7. Claims 1-11 and 13-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

8. The following is a statement of reasons for the indication of allowable subject matter:

While it is known in the art to provide an automatically cleaned filter comprising an outer case, said outer case comprises a lid that can be opened to put the filter therein, wherein the outer case has a water inlet and one or more water outlet, said outer case further comprises a cleaning apparatus that moves to clean the filter inside and is connected to a motor outside the outer case (see, for example, US Pat No 4,337,158 to Bodine) and it is known in the art to provide a filter with a pump and cotton core (see, for example, US Pat No 5,585,010 to Dockery et al.), in the examiner's opinion, the prior art fails to teach or fairly suggest the apparatus containing the combination of elements recited.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References are cited of interest to show the state of art.
